Zoo Outreach Organisation, under its 1Ocean (1 Ocean Conservation Education Action Network) Initiative conducted an Educators' Workshop on Ocean literacy for teachers of 19 government schools across the Ramanathapuram district on 3rd, 4th and 5th July 2024 at CMFRI. The workshop aimed to train the teachers to incorporate marine biodiversity and ocean conservation into the curriculum with the help of activities and experiential learning provided by a manual "Seaside Classrooms: Empowering Educators for Ocean Conservation" produced and published by Zoo Outreach Organisation. The objective of the manual is to utilize Rameswaram diverse ecosystems for educators to teach their students. To provide community engagement after this workshop the teachers and the students with help from the Zoo Outreach team will have an exhibition to showcase their work in the last week of August.
