

# Pollinators !

Packet consists of a ● Cover ● Poster ● Placard ● Medal ● Headband ● Sticker ● Booklet

Invertebrates such as bees and butterflies are not the only pollinators. In addition to it vertebrates such as primates, bats, reptiles, and squirrels are also pollinating flowers. About 40,000 invertebrate and 1500 vertebrate are pollinators. They play an important role supplying food to human and other living organisms and maintain biodiversity. This packet helps to learn more about native pollinators.
